Problems of Planetology, Cosmochemistry and Meteoritica 5

Barenbaum A.A. Virtual-corpuscular mechanism of gravity in space and its effect on light photons and Sun motion in Galaxy. <i>UDC: 539.12</i>	5
Basilevsky A.T. ¹ , Krasilnikov A.S. ¹ , Li Yuan ² , Michael G.G. ³ Surface morphology of three permanently shadowed and two normally illuminated floors of lunar craters. <i>UDC 523.3</i>	8
Glazovskaya L.I. Planar deformations in zircon from impactites and conditions of their formation. <i>UDC 552+550.42</i>	11
Gorbachev P.N., Bezmen N.I. Modeling of the chondrite structure of carbonaceous meteorites at T=1000°C, P=1 kbar in the presence of hydrogen. <i>UDC 550.4</i>	13
Guseva E.N. and Ivanov M.A. Spatial and genetic relationships of coronae - sources of young lobate fields and large volcanoes of Venus. <i>UDC 523.42</i>	15
Guseva E.N. and Ivanov M.A. Comparison of rifting and volcanic activity of Atla and Beta Regiones, Venus. <i>UDC 523.42</i>	18
Khisina N.R., Teplyakova S.N., Korochantsev A.V., Abdrakhimov A.M. Carbonaceous chondrite clast in the Elga iron meteorite. <i>UDC 552.61</i>	20
Krasilnikov A.S., Ivanov M.A. Determination of the mixing factor of local and foreign material in the Langrenus crater ejecta	23
Malyshev D.G., Ivanov M.A. Evolution of central-type volcanism on Venus (preliminary results)	26
Maxe L.P. Morphological analysis of fragments: object, explosion, iron bolide hypothesis. <i>UDC 524-1/-8</i>	29
Shornikov S.I., Yakovlev O.I. Condensation parameters of perovskite as the least volatile compound of CAIs matter.	32
Shpekin M.I. ¹ , Ferreyra R.T. ² , Shishkina V.S. ¹ Shock wave processes on the Moon on the Aitken crater example	34
Tselmovich V.A. ¹ , Kuzina D.M. ² , Muftakhedinova R.F. ³ , Yakovlev G.A. ³ , Ezhov V.F. ⁴ , Chetverikov O.Yu. ⁴ , Bulat S.A. ^{3,4} The first detection of tin and copper particles in the magnetic component of space matter from Antarctica collected by a magnetic trap. <i>UDC 523. 3-1/-8</i>	38

Mineral equilibria at high PT-parameters 42

Chertkova N.V., Spivak A.V., Zakharchenko E.S., Safonov O.G. The structure of oxalic acid dihydrate at high pressures and elevated temperatures: spectroscopic investigation in a diamond anvil cell. <i>UDC 550.41</i>	42
Fedkin V.V. Subduction of the Maksyutov eclogite-blueschist Complex: regularities and questions.	43
Kostyuk A.V., Gorbachev N.S., Novikov M.P., Nekrasov A.N. Experimental study of basalt-anhydrite system at 0.1 mPa, 1250°C: phase composition and distribution of elements. <i>UDC 123.456</i>	47

Thermodynamic properties of minerals and fluids 51

Khodorevskaya L.I., Kosova S.A., Viryus A.A. Melt compositions during partial melting of gabbro-anorthosites under conditions of chemical potential gradients of FeO, V ₂ O ₃ and TiO ₂ . <i>UDC 552.13</i>	51
Khodorevskaya L.I., Kosova S.A., Viryus A.A. Partial melting of gabbro-anorthosites and concomitant metasomatism with different composition of the fluid phase. Experimental studies. <i>UDC 552.13</i>	54
Shornikov S. I. Thermodynamic properties of the Li ₂ O–SiO ₂ melts.	58
Shornikov S.I. Thermodynamic properties of the Li ₂ O–P ₄ O ₁₀ melts.	61

Synthesis of minerals 65

Iskrina A.V. ¹ , Spivak A.V. ¹ , Setkova T.V. ¹ , Khasanov S.S. ² , Kuzmin A.V. ² , Zakharchenko E.S. ¹ , Viryus A.A. ¹ Synthesis and structural characteristics of a new compound GaGeO ₃ OH - an analogue of the Egg phase AlSiO ₃ OH.	65
Iskrina A.V., Spivak A.V., Setkova T.V., Zakharchenko E.S., Viryus A.A. Comparative analysis of stability of GaGeO ₃ OH and AlSiO ₃ OH at high pressure (up to 30 GPa)	68
Kotelnikov A.R., Suk N.I., Kotelnikova Z.A., Akhmedzhanova G.M., Drozhzhina N.A. Feldspars and their solid solutions: an experimental study. <i>UDC 550.89:549.07</i>	73
Kotelnikov A.R., Korneeva A.A., Kosova S.A., Suk N.I., Drozhzhina N.A. Synthesis of feldspars with gallium and germanium. <i>UDC 550.89:549.07</i>	74
Kovalskaya T.N. ¹ , Ermolaeva V.N. ^{1,2} , Kovalskiy G.A. ¹ , Varlamov D.A. ^{1,3} , Chukanov N.V. ³ , Chaychuk K.D. ¹ , Ermolaev D.N. ¹ Zircono- and titanosilicates - indicators of alkalinity in alkaline pegmatites (by experimental data).	75

Kuzyura A.V., Spivak A.V., Setkova T.V., Iskrina A.V., Zakharchenko E.S., Viryus A. A. High-pressure synthesis of Ge-analogues of olivine (α -Mg ₂ GeO ₄) and spinel (γ -Mg ₂ GeO ₄). <i>UDC 550.4.02, 549.057</i>	77
Verchenko P.A., Setkova T.V., Spivak A.V., Zakharchenko E.S. Synthesis and high-pressure stability of NaGaGe ₂ O ₆ with pyroxene structure. <i>UDC: 549.642</i>	81

Hydrothermal equilibria and ore formation 86

Alekseyev V.A. Experimental and computational assessment of kinetic conditions of quartz geothermometer use. <i>UDC 550.4.02</i>	86
Korzhinskaya V.S. Behavior of sodium and calcium during dissolution of natural pyrochlore in chloride solutions. <i>UDC 550.814</i>	89
Kotova N.P., Korzhinskaya V.S. Study of the behavior of natural pyrochlore and niobium oxide in chloride aqueous fluids (based on experimental data)	93
Novikov M.P., Nekrasov A.N., Gorbachev P.N. About the genesis of the kularite. <i>UDC 550.4</i>	96
Redkin A.F., Kotova N.P., Nekrasov A.N. Features of the interaction of NaF with niobium oxide compounds in hydrothermal solutions.	98

The formation and differentiation of magmas 101

Kotelnikov A.R., Suk N.I., Korneeva A.A. Distribution of Nb and Ta in the system of tantalum niobate – aluminosilicate melt. <i>UDC 550.8.014</i>	101
---	-----

Physical chemical properties of geomaterials 103

Bublikova T.M., Setkova T.V., Drozhzhina N.A., Nekrasov A.N., Balitsky V.S. Experimental study of the mechanism of malachite leaching by ammonium hydroxide solutions. <i>UDC 549.743.12:546.171.1</i>	103
Verchenko P.A., Setkova T.V., Spivak A.V., Zakharchenko E.S. Raman spectroscopy of synthetic co-bearing tourmaline. <i>UDC: 549.612;543.424.2</i>	106

Experimental geoecology 111

Akhmedzhanova G.M., Malinkina G.V., Kotelnikov A.R. Modeling of solubility and transport of heavy metals (Ni, Cu, Zn, Pb) in natural waters. <i>UDC 550.84.092</i>	111
Grishantseva E.S., Nikolaeva I.Yu., Grigorieva M.L. Study of metal forms in bivalve shells from the Ivankovskoe Reservoir. <i>UDC 550.47</i>	112
Salavatova D.S., Fiaizullina R.V., Bychkov D.A. Mercury in minor rivers of Moscow (on the example of the Setun' and Ramenka rivers). <i>UDC 550.41 550.424</i>	114
Zharikov A.V., Malkovsky V.I. An experimental study of the permeability of granite-gneisses samples from Yeniseyskiy site of the Nizhnekanskiy massif, Krasnoyarsk region. <i>UDC 621.039.7</i>	116

Engineering of experiment 120

Molchanov V.P. ¹ , Medkov M.A. ² , Ivannikov S.I. ² Decomposition of rocks using a mixture of sulfate and ammonium bifluoride for elemental analysis. <i>UDC 553.22+551.2</i>	120
--	-----

Interaction in the systems of fluid–melt–crystal 124

Chevychelov V.Y., Viryus A.A. Study of F and Cl partition between biotite crystallizing from melt and granite melt at subliquidus conditions. <i>UDC 550.42</i>	124
---	-----

CONTENTS

Chevychelov V.Y., Viryus A.A. Influence of pressure and melt composition on the partition of F and Cl in the biotite - granite melt system. <i>UDC 550.42</i>	126
Gnuchev Y.Y., Bychkov D.A., Koptev-Dvornikov E.V. An improved equation for calculating the solubility limit of water in silicate melts depending on intensive parameters. <i>UDC 552.112</i>	129
Korzhinskaya V.S., Suk N.I., Kotelnikov A.R., Novikov M.P., Van K.V. Solubility of $Zr_{0.5}Hf_{0.5}SiO_4$ solid solution in aluminosilicate melt at temperatures of 800 °C, 1000 °C and pressures of 200, 400 MPa. <i>UDC 550.89</i>	132
Persikov E.S. ¹ , Bukhtiyarov P.G. ¹ , Aranovich L.Ya. ^{2,1} , Sultanov D.M. ¹ , Shaposhnikova O.Yu. ¹ , Nekrasov A.N. ¹ Some features of the interaction process in the basalt melt - methane-hydrogen fluid system at moderate pressures (preliminary results).....	135
Rusak A.A. ¹ , Alferyeva Y.O. ² , Dushenko N.V. ¹ , Fedulov V.S. ¹ , Shchekina T.I. ² Study of water solubility in acidic fluorine-containing glasses by IR and Raman spectroscopy. <i>UDC 552.08, 552.12</i>	138
Shchekina T.I. ¹ , Zinovieva N.G. ¹ , Alferyeva Ya.O. ¹ , Kotelnikov A.R. ² , Rusak A.A. ³ Behavior of the main rock-forming elements, tungsten and molybdenum during the interaction of granite melt with dolomite at 700 °C and $P_{H_2O} = 1$ kbar in the presence of fluorine. <i>UDC 552.113</i>	142
Suk N.I., Kotelnikov A.R. Experimental study of sphalerite solubility in aluminosilicate melts at $T=900$ °C and $P=2$ kbar. <i>UDC 550.89:549.08</i>	145
